Activities – S1-3

Year group

S1

S2

S3

Subject/Teacher

Maths – Mr Boyle

Online activities

All pupils have been added to a Team on Glow. If possible, check Teams regularly for new information/activities.

Digital copies of textbooks should be available soon. Until then, the website mathsrevision.com has lessons and activities which are relevant to the course being followed. Click on 'N4 Numeracy' and then click on the links for topics to revise, particularly 'FDP', 'Graphs & Tables' and 'Probability'. These will still be useful once textbooks are available.

Alternative activities

Once textbooks are available, these can be downloaded to be accessed offline on mobile devices. Pupils should work through the exercises in the Numeracy section, particularly chapters 22,23, 27 and 10 (in Expressions and Formulae section). Pupils should try to complete and mark what they can and take a note of anything they can't complete. Many of the class have completed the first section of the National 4 Numeracy Assessment. Those who haven't should make sure they revise the other chapters in the Numeracy section as they will still have to sit this part in the future.
