Activities – S1-3

Year group

S1

S2

S3

Subject/Teacher

Science : Life of Plants

Online activities

1. Watch this programme from the David Attenborough series.

Make a note of all the plants mentioned.

You can display this as a mind map or any other way. There will be some further tasks based on this to follow. Keep checking on teams for any specific work for your class.

Private Life of Plants - Growing - video dailymotion
www.dailymotion.com

2. The powerpoint for this topic is on Science Orange S2 Team under class materials /S2 Life of Plants. Your teacher will message you via teams with the specific things that they want you to do. There is also a homework booklet for you to work through and separate homework activities.

Alternative activities

1. When you are taking your daily exercise, count how many different plants that you see. Make a note of any that you know the names of.

2. Many plants are foods. Text /phone/message as many people as you can to find out their favourite plant food e.g carrot, peach, leek etc. Put your results in a table and then draw a bar graph of these results
